WHAT ARE MICRO-CREATORS

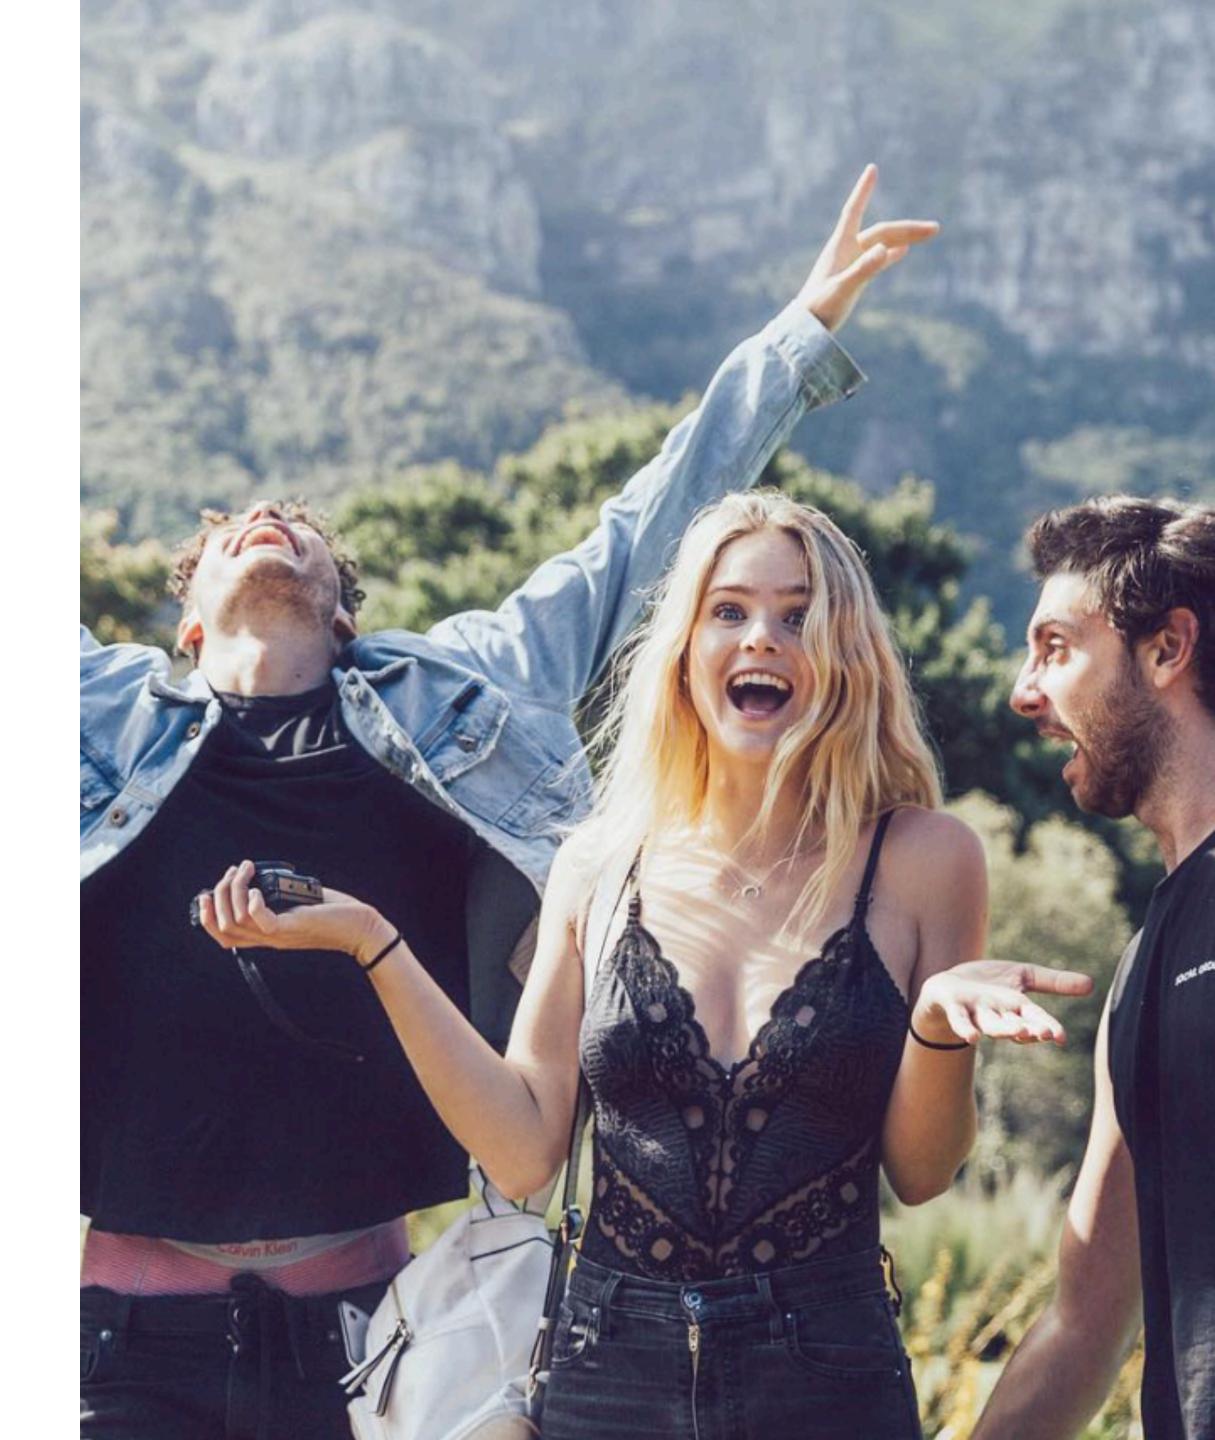

The Benefits Of Micro-Creators.

A Micro-Creator is unlike any other typical Social Media Celebrity, Expert, or Public Figure.

These Creators are focused on more specialized Demographics. Unlike your traditional large Influencers, Micro-Creators have more active niche-based followers typically in the thousands with much higher engagements.

For example, a gym Influencer might boast millions of followers with 3% engagement and cost \$15,000 for a branded Instagram post. A Gym Micro-Creator may only have only 8,000 followers but their average post receives a healthy 20%+ engagement and cost only \$150. The typical micro-creators following ranges from 1.5k to 50k followers.

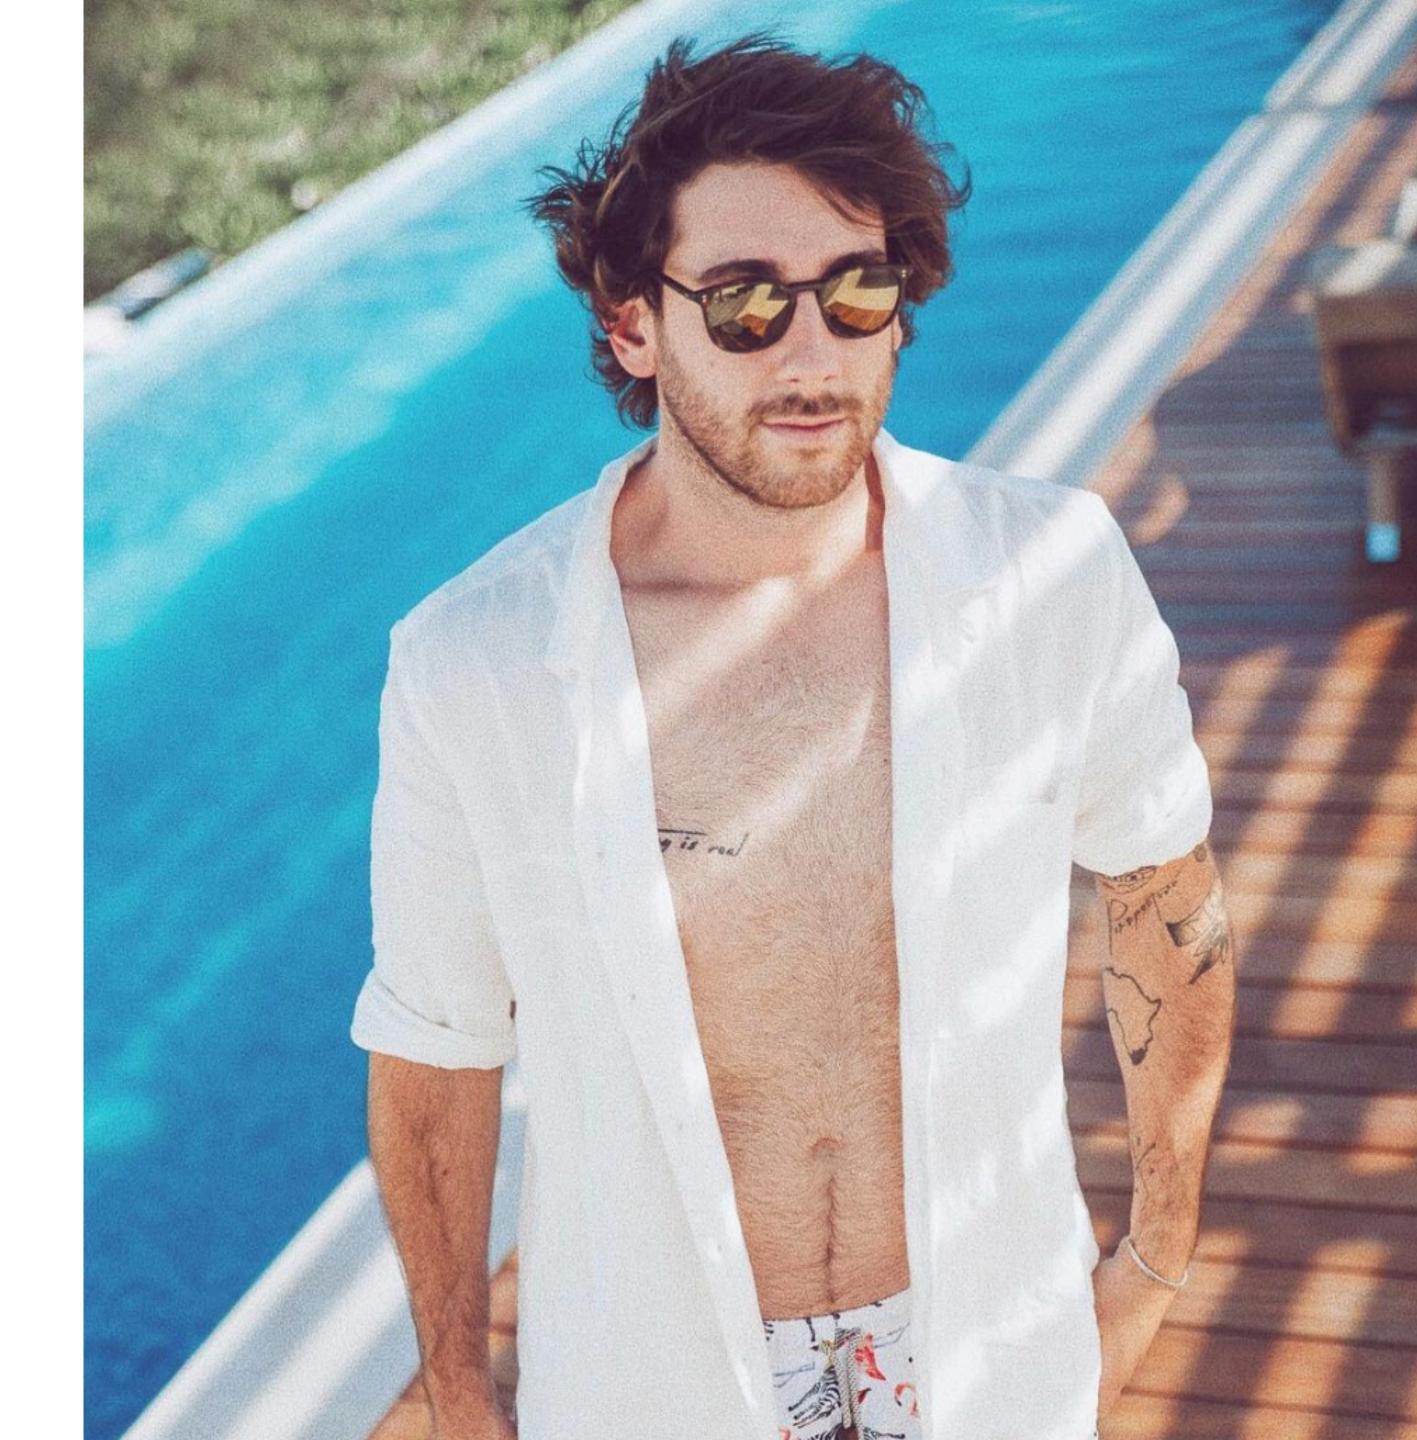

MICRO-CREATORS

More Engagement. More Conversions. More Effort.

Our Agency specializes in Micro-Creators. We feel that working with large Creators is becoming saturated and expensive. Focusing on Micro-Creators with high engagement allows us to deliver better results for a portion of the price. Instead of doing a brand deal with one creator at 250k+ followers, we'll bring you 25+ hand picked, niche related Creators for less.

Stats Don't Lie.

Our Thoughts.

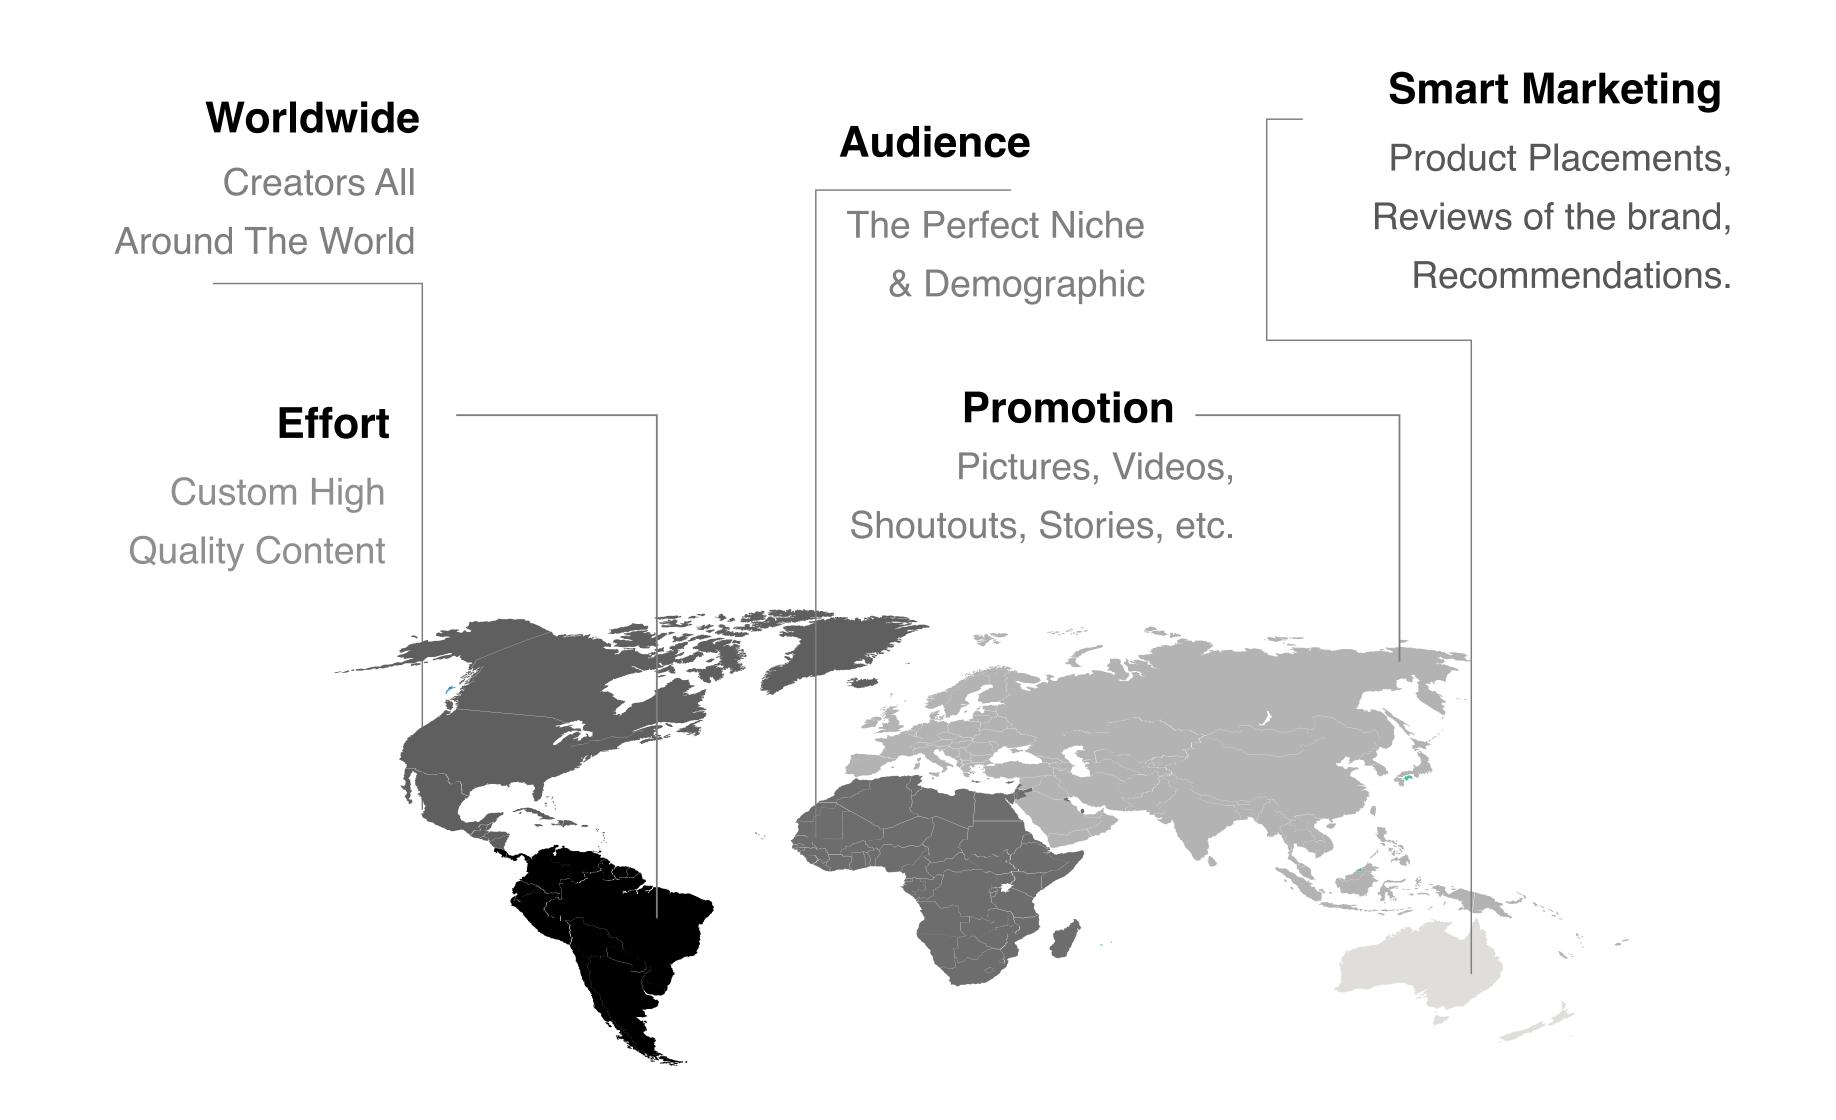

Large Influencer post Sponsored content all the time making their followers less likely to convert and take action the next time.

Large Influencers brand deals feel less authentic. A low percentage of their followers are mostly likely actually interested in that specific product.
